Experience

Mobile Application Development Intern

Inner Eye Consultancy Services – Mendine Group of Pharmaceuticals

December 2024 – March 2025

Successfully designed and developed a comprehensive Timesheet Management System, leveraging React Native for the mobile application and .NET Core 6 as the backend framework, with MSSQL Stored Procedures for efficient data management.

This scalable solution enabled users to effortlessly log and manage their timesheets, streamlining administrative tasks and boosting productivity. By seamlessly integrating frontend and backend technologies, I delivered a high-quality system that met clients' needs and exceeded expectations.

Technical Skills and Projects

Programming: C, Java, Dart, JavaScript, Python, SQL.

Design: Wix, Figma, Canva, Adobe XD

Project 1: Loop: A Social Media App

Created a responsive cross-platform social media mobile application using Flutter with core features as sharing photos and videos, commenting and liking posts and editing one's profile layout. Used Firebase as cloud storage to manage user media assets and data, along with integration of Google Sign-In API for secure authentication. Implemented Riverpod for dynamic state management and applied MVVM Architecture to ensure scalable code.

Frontend: Flutter(Dart), Material UI

Backend Cloud Database: Firebase (NoSQL)

State Management: Riverpod

Project 2: DocLab: An Online Reservation System to Book Doctor Appointments

Implemented a responsive web based reservation system to book doctor appointments using Django with core features as a responsive UI, hassle-free reservation and cancellation of available dates and timing slots without any interference or collision, session management and auto email confirmations and WhatsApp reminders. Used MySQL as Database to manage user data and doctor information, along with integration of Gmail API for email alerts and confirmations and Python's open source WhatsApp Cloud API to send Whatsapp alerts.

Frontend: HTML, CSS, Js, Django jinja template

Backend: Python

Database: MySQL

Awards and Achievements

Indian Journal of Computer Science and Engineering, Vol 15, No.3

May – June 2024

A REVIEW ON MITIGATING SECURITY THREATS IN AADHAAR

Acknowledged in a published journal paper for contributions to a workflow diagram in collaboration with Assistant Professor Ms. Reshmi Maulik at Meghnad Saha Institute of Technology focusing on Network Optimization Algorithms.
